Work Experience

Jan 2016 - *Current* | **Perito Analista en Informática at Poder Judicial de la Nación**
Informatics Specialist giving support on any software related matter that may occur during a trial.

Jan - Mar 2016 | **Architecture Lead at OLX**
Managed both the two Software Architects and the QA Lead, with the goal of defining a technological vision for the company, that would ensure that the teams would count with a predictable development process that provides a sustainable value delivery, while helping them grow professionally.

Sep 2015 - Jan 2016 | **Software Architect at OLX**
Coordinate the design and interaction of the different components developed by the development teams that focused in different flows of the product, posting, user, search, etc.

Sep 2014 - Sep 2015 | **Backend Software Engineer Lead at OLX**
Responsible for a team of six people that developed and maintained the mobile backend components and public API, providing content for all clients, Web and MobileWeb, and iOS and Android apps.

Mar 2011 - Sep 2014 | **Software Engineer at OLX**
Worked on the mobile department, developing and maintaining the MobileWeb, partly in HTML5 with jQueryMobile, and PHP in its backend, and also the Java API that connected with the Android and iOS apps.
Later on, I was part of designing and developing from scratch a new API built in Scala, developed entirely using TDD.

Aug 2007 - Mar 2011 | **Analyst Programmer at Redmond Software**
Worked on several .NET VB and C# projects, building a couple from ground up, and inheriting and maintaining some others.

Education

2005 - 2013	Informatics Engineer, **Instituto Tecnológico de Buenos Aires** Major: Computational Intelligence Thesis: "ItBot2: Autonomous Robot for R&D" | Advisor: Dr. Juan Miguel SANTOS
